

Sun Protection

Sun protection prevents premature aging and is a critical component of all skin therapies. HBS has developed proprietary technology to enhance the efficiency of sunscreen products.

Greater sun protection at lower sunscreen levels results in products with lower irritation and enhanced esthetics.

HBS SUNSCREEN COLLECTION

SPF 55+ Very Water Resistant. Available in lotion, spray (pump and continuous) and cloth formats in a variety of sizes.

SPF 30+ Very Water Resistant. Available in lotion form.

SPF 30+ Daily Defense Mineral Sunscreen. Utilizing all natural emulsifiers and emollients, this non-whitening formula provides excellent broad spectrum protection. Ideal for consumers desiring all natural sun protection.

SPF 30+ Daily Defense Skin Protection. A mineral based formula with broad spectrum performance, this system also provides defense against the elements resulting in an added measure of protection from environmental damage.
